# Objective

This Graduate Destination Survey was conducted in September 2013.

As in the previous years, the objective of the survey was to gather graduate employment information.

This information gather will be essential to JCU Singapore Career Advisory Centre to better advise and assist graduands and graduates.

The information will also be used by Marketing staff to communicate JCU Singapore graduate employment trends to prospective students.

# Sample & Methodology

---

## **Sample**

The survey sample consists of JCU Singapore graduates who participated in the JCU Singapore Graduation Ceremony in May 2013. This is a voluntary survey, hence, graduates can choose not to respond.

## **Methodology**

The survey was conducted electronically through an online survey platform for ease of user participation & data collection. Statistics are shown in percentage unless upon written request to JCU Singapore.
